## Unique Qualities

Excellent Communicator. Vast, Recent, Prominent Experience, Alleged Good Sense of Humor

## Skills

I use my mastery of **XHTML**, **CSS**, **Javascript**, and **AJAX** to build websites.

I understand **MySQL** and **PHP & Rails** well enough to keep up with my fellow developers.

I'm comfortable working in either **Subversion** or **Git** environments.

Over the years, I've mastered the **Wordpress API** and can pick up most templating systems.

I've also used **Akamai**, **Omniture**, the **Flickr API**.

My skill-set doesn't end where my fingertips begin. I have demonstrated an **ability to lead**, a **passion for the small things**, **love clean code**, **treat projects like my babies**, **play chess**, **work well with a team**, and **read Hacker News** (never during work, of course).

## Experience

**Front-End Developer, Professional Aptitude Council** Palo Alto, CA *jun2008 - oct2009*

One of five developers building a career advancement and hiring destination. XHTML, CSS, AJAX, Rails, Git.

- Wide range of responsibilities, including overseeing site creation, wireframing, hand-coding front-end, and maintaining site post-launch.
- Start-up culture: Worked long - often sleepless - nights to meet deadlines.
- Defined most of the team's coding standards to increase both flexibility and cleanliness of front-end code.
- Worked closely with design team on ideation and review of designs for both marketing campaigns and site builds.

• **Front-End Developer, 360water (contractor)** Columbus, OH *apr2009 - jun2009*

Developed site from mock-up for Ohio-based wastewater company. XHTML, CSS, Javascript.

• **Web Developer, Satya Devi Memorial Trust** Fremont, CA *jan2009 - mar2009*

Built online registration system and microsite for Bay Area non-profit. Custom PHP system was integrated into Wordpress theme. XHTML, CSS, Javascript, PHP, WordPress.

- Evaluated current paper-based system of registration for the organization's annual contest and built an online system to replace it.
- Converted static site into a Wordpress site, thus eliminating the need for frequent web developer intervention. Bulk of site's updates now performable by any non-tech staff member.

**Web Developer, AKQA (contractor)** San Francisco, CA *apr2008 - may2009*

Hired to implement highly customized portfolio to showcase work of AKQA interactive design agency. XHTML, CSS, Javascript, PHP, WordPress.

• **Web Designer, nSolutions (contractor)** Santa Clara, CA *aug2007 - sep2007*

Reorganized and rebuilt company web presence, including logo and branding for enterprise solution company. Photoshop, PHP, XHTML, CSS, AJAX, Javascript.

- Directed website away from cluttered design to focus on content, including highlighting white papers for search engine optimization.
- Built rotating content system using PHP to attract attention of returning potential customers.

**Sr. Web Developer, Epocrates** San Mateo, CA *oct2006 - nov2007*

Implemented and managed community-oriented projects for medical reference mobile software company. Investigated emerging technologies to improve efficiency. PHP, XHTML, CSS, Javascript, AJAX, Mac Widgets.

- Researched possibility of shifting development resources to Rails, starting with web discussion forum. Concluded that long-term popularity and efficacy of PHP not in question and effort required to adapt to Rails outweighed unique benefits of Rails over PHP.
- Learned how to make widgets for Mac OS X and built medical reference lookup widget as part of marketing drive.
- Handled bulk of XHTML and CSS coding for new layouts, including multi-page layout for blog. Delivered clean code and organized CSS for ease of future changes.

**Sr. Web Developer, Yahoo (contractor)** Santa Clara, CA *sep2006 - oct2006*

Developed features for Yahoo! as per mockup and specifications. XHTML, CSS, AJAX, Subversion.

- Built "Pulse" module for Yahoo! Autos to showcase Top 5 lists using AJAX and Yahoo UI library. Commonly shown on front page of Yahoo.com.

**Technical Lead, Intel** Santa Clara, CA *mar2005 - sep2006*

Led development on primary web presence for Intel.com. Frequently delivered pixel-perfect XHTML and CSS on tight deadlines to avoid causing delay of marketing pushes. XHTML, CSS, Javascript, Photoshop, Omniture, Akamai.

- Lead developer for launch of Intel Gaming 'Call of Duty 2' campaign. Coded design using XHTML and CSS, including Flash embedding, Akamai resource customization, and oversaw Omniture tracking integration.
- Recommended site-wide transition to XHTML and table-less layouts. Built first non-table Intel microsite. Supported eventual transition to new Intel.com vision.
- Lead developer for launches of flagship chips, Intel Viiv microsite, and Intel TechWire Newsletter.
- Proposed custom content management system for Intel TechWire Newsletter to replace current manual editing and backup system. Built first version of internal system using PHP and MySQL. Cut down time needed to update newsletter from 3 hours to 20 minutes by giving stakeholders easy-to-use system for adding content and streamlining graphics delivery process.
- Recipient of various awards for initiative and excellence, including STAR award - Intel's highest technical honor.

• **Head of Web Development, The CalTV Project** Berkeley, CA *may2005 - may2006*

Customized WordPress for use as video blogging platform for UC Berkeley's online TV station. Involved in strategy and creative process. PHP, WordPress, XHTML, CSS, Javascript, Flash, Photoshop.

- Modified WordPress administration console with custom plugins and hacking core installation files.
- Built custom WordPress theme to support automatic display of Flash video using XHTML, CSS, PHP, and Javascript.
